

# ANALYTICAL SERVICES

There is more to our AIHA-LAP, LLC accredited lab (ID 157811) than just analyzing samples. Of course, providing high quality technical services is a priority.

For us, however, we strive to give our clients the personal attention and loyalty they deserve. Just as we depend upon our clients for growth of our business, our clients depend upon us for timely and accurate results. They look to us for help when uncertain about how and what to sample. To meet these objectives and expectations we continually perform quality control checks and adhere to strict internal procedures for sample receipt, preparation, analysis, and reporting. Our performance is regularly checked by participation in professional programs that independently test and verify our capabilities. OSHTECH offers a wide range of analyses to industry, hygiene professionals, environmental engineers, and occupational health consultants, including a wide range of services & supplies.

## THE SERVICES ...
